

Pneumatic diaphragm valve MV305

Compact type Light weight

The MV305 Compact Pneumatic Diaphragm Valve is an automated valve developed for replenishment and circulation control for chemical media and high frequency control applications. It has the advantages of small volume, light weight, small air consumption, accurate response time, etc., which meets the fluid control requirements of most precision wet equipment.

Easy installation and maintenance

- * Integrated compact design ensures installation in limited space
- * All plastic appearance structure, no exposed metal parts and bolts, beautiful corrosion resistance
- * Excellent lubrication performance, maintenance free
- * G thread is made standard for easy connection installation and maintenance
- * Integrated visual position feedback for easy observation
- * Laser marking, clear identification guarantee after long-term use

High safety performance

- * The diaphragm adopts multiple sealing structure design to ensure safety
- * A variety of materials available, can withstand high temperature and corrosion
- * Curved diaphragm more malleable, high life
- * With diaphragm rupture observation and diversion port
- * High quality and reliability for a high number of operations

High Flexibility

- * Diaphragm material EPDM, PTFE, selected for water, acid and alkaline media
- * Interface material PVC-U, PVC-C, PP-H, PVDF
- * Standard metric, American standard, Japanese standard

Performance characteristics

- * Medium pressure 0... 5 bar
- * Control pressure 4... 5 bar
- * Temperature tolerance 5... 90°C
- * Can be used in high-frequency occasions ≤ 30 times /Min

+ Technical characteristics

Pressure temperature curve

All data based on water for considering 25 years safe life time

Other liquids request to reduce the temperature and pressure accordingly

Control pressure

The maximum input value for pressurized air is 5 bar

+ Technical characteristics

Flow capacity

All data are for 20°C water with 1 bar pressure difference

Limit switch MA630

- Modular expansion, easy maintenance
- Equipped with a transparent protective cover, which can effectively protect the safety of the switch
- LED indicator to provide working status indication
- Imported photoelectric switch, long life, high reliability
- Cable output type, standard length 1m

Voltage	5V DC ... 24V DC \pm 10%
Electric current	\leq 15 mA
Output signal	PNP or NPN, Maximum output current 50 mA
Class of protection	IP64 (IEC)
Ambient temperature	-25°C ... +55°C(Be careful not to condense or freeze)
Ambient humidity	5% RH ... 85% RH
Cable parameter	0.09mm ² 4 core, PVC rubber insulated cable
